PROFILI IN GESSO PER LED

[www.dmplasterdesigner.com](http://www.dmplasterdesigner.com)

Gli stucchi sono frutto di una tradizione millenaria,  
che con il tempo ha continuato ad evolversi insieme alle esigenze  
e al gusto estetico della società.

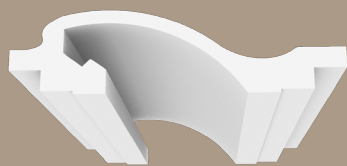

DM Plaster Designer è un laboratorio di idee e soluzioni,  
in linea con lo stile architettonico che è in continuo mutamento.

Realizziamo le nostre cornici e i profili tirandole sul banco, e molti di questi  
possono essere realizzati sia lineari sia curvi.

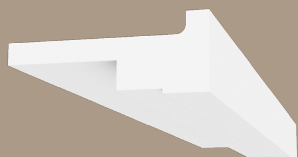

Utilizziamo un metodo diverso dal colaggio negli stampi proprio perchè  
ci permette di ottenere un'ottima rifinitura dei dettagli e di creare  
pezzi unici e particolari.
